## **EMERGENCY MEDICAL SERVICES**

*Standard Operating Procedures, Ranks, Radio Codes & MDT Manual*

**SEASON 2 • OFFICIAL COMMAND STAFF EDITION**

Authorized by the Office of the Chief of EMS  
Distribution: EMS Command Staff Only

## Table of Contents

---

## 1. Chain of Command & Rank Structure

Apex City EMS runs on a single unified rank ladder, from Student up to Chief. Every member holds one rank at a time, is assigned to a numbered post, and is issued a callsign from that rank's official range for radio and MDT use.

### 1.1 Department Tier Structure

This is the department's general authority tier, used for permissions and reporting weight across every rank:

| Tier                      | Level       |
|---------------------------|-------------|
| High Command              | 1 (Highest) |
| Human Resource            | 2           |
| Sub Department Head       | 3           |
| Field Training Paramedic  | 4           |
| Sub Department Supervisor | 5           |
| Probationary Trainee      | 6 (Lowest)  |

### 1.2 Rank & Callsign Reference

| Rank             | Post / Responsibility | Callsign Range  |
|------------------|-----------------------|-----------------|
| Chief            | High Command          | XE-100          |
| Deputy Chief     | High Command          | XE-101          |
| Captain          | Medi High Command     | CP-250 – CP-251 |
| Surgeon          | Medic Command         | S-300 – S-301   |
| Senior Doctor    | Medic Command         | SD-350 – SD-351 |
| Doctor           | Medic Supervisor      | D-400 – D-402   |
| Junior Doctor    | Medic Supervisor      | JD-450 – JD-455 |
| Senior Paramedic | Medic Supervisor      | SP-500 – SP-504 |
| Paramedic        | Medic                 | P-550 – P-558   |
| Resident         | Medic                 | R-600 – R-605   |
| Advanced EMT     | Medic                 | AE-650 – AE-653 |
| EMT              | Medic                 | E-700 – E-706   |
| Student          | Medic in Training     | ST-900 – ST-906 |

### 1.3 Callsign Format

Callsigns follow the format [Prefix]-[Number], announced phonetically on radio. Examples:

- XE-100 — Chief
- CP-250 — Captain, post 250
- SP-503 — Senior Paramedic, post 503
- P-555 — Paramedic, post 555
- E-702 — EMT, post 702
- ST-901 — Student, post 901

Post numbers within a rank's range are assigned by High Command at onboarding or promotion and logged in the MDT Roster.

### 1.4 Promotion Pathway

Student → EMT → Advanced EMT → Resident → Paramedic → Senior Paramedic → Junior Doctor → Doctor → Senior Doctor → Surgeon → Captain → Deputy Chief → Chief.

Promotion into Captain and above is by High Command nomination only.

## 2. EMS Radio 10-Codes

These are Apex City's official EMS 10-codes. Standard codes cover routine radio traffic, Priority codes flag urgent-but-stable situations, Emergency codes require an immediate response, and 10-99 is reserved for Directors only.

| Code  | Meaning           | Priority |
|-------|-------------------|----------|
| 10-2  | Signal Good       | Standard |
| 10-3  | Stop Transmitting | Standard |
| 10-4  | OK or Affirmative | Standard |
| 10-7  | Out of Service    | Standard |
| 10-8  | Back in Service   | Standard |
| 10-9  | Repeat            | Standard |
| 10-10 | Negative          | Standard |
| 10-16 | Return to Pillbox | Standard |
| 10-19 | Police Station    | Standard |
| 10-20 | Location          | Standard |
| 10-23 | Arrived At Scene  | Standard |

| Code   | Meaning                              | Priority      |
|--------|--------------------------------------|---------------|
| 10-25  | Meet At                              | Standard      |
| 10-41  | Beginning Duty                       | Standard      |
| 10-42  | Ending Duty                          | Standard      |
| 10-76  | Inroute                              | Standard      |
| 10-91  | Transport Unit Required              | Standard      |
| 10-97  | Signal Test                          | Standard      |
| 10-32  | Person with Gun                      | Priority      |
| 10-47  | Injured Civilian                     | Priority      |
| 10-50  | Vehicle Accident                     | Priority      |
| 10-52  | Ambulance Needed                     | Priority      |
| 10-70  | Explosion                            | Priority      |
| 10-72  | Hostage Situation                    | Priority      |
| 10-77  | Need Backup (Non-Emergency)          | Priority      |
| 10-79  | ETA                                  | Priority      |
| 10-13A | PD Officer Down                      | Emergency     |
| 10-14A | Medic Down                           | Emergency     |
| 10-78  | Need Backup (Emergency)              | Emergency     |
| 10-99  | Everyone Respond (Director use only) | Director Only |

### 3. Hospital Color-Code Priority System

| Color Code  | Meaning                                                                                   |
|-------------|-------------------------------------------------------------------------------------------|
| Code-Red    | Top priority call — transfer the patient to ICU / shootout nearby                         |
| Code-Blue   | Patient flatlining and requires immediate resuscitation using a defibrillator             |
| Code-Yellow | Patient moderately injured and requires urgent attention — transfer to ICU / General Ward |
| Code-Green  | Minor injuries — transfer to General Ward (least priority)                                |
| Code-Purple | Bomb threat — evacuate hospital                                                           |
| Code-Silver | Lockdown — hostile present                                                                |

| Color Code | Meaning                                            |
|------------|----------------------------------------------------|
| Code-Black | Patient deceased — transfer to morgue (non-urgent) |

## 4. Priority & Situation Codes

| Code    | Meaning                      |
|---------|------------------------------|
| Code 0  | FiveM Server Crash           |
| Code 1  | No Lights / Patrolling       |
| Code 2  | Only Light / No Sirens       |
| Code 3  | Lights On / Siren On         |
| Code 4  | All Clear                    |
| Code 6  | Searching Area               |
| Code 12 | Going for Personal Work      |
| Code 44 | Food Break                   |
| Code 50 | Working on Document / Report |

## 5. Radio Abbreviations

| Abbreviation | Meaning                                               |
|--------------|-------------------------------------------------------|
| RTO          | Radio Traffic Only — stop non-essential transmissions |
| UTL          | Unable to Locate — subject/patient not found          |
| ETA          | Estimated Time of Arrival                             |
| DOA          | Dead on Arrival — patient deceased before EMS arrival |
| RTB          | Return to Base — going back to hospital/station       |
| BLS          | Basic Life Support — non-critical transport           |
| ALS          | Advanced Life Support — critical patient care         |
| LZ           | Landing Zone — helicopter landing area                |
| MCI          | Mass Casualty Incident — multiple patients involved   |

## 6. The Apex City EMS Oath

*"I solemnly pledge to dedicate my life to the service of humanity. I will care for my patients with compassion, respect, and integrity. I will uphold the dignity of my profession and maintain the highest ethical standards. I will protect life, prevent harm, and preserve confidentiality. I will continue to learn and share my knowledge for the benefit of my patients and society."*

Every recruit recites this oath at the conclusion of orientation, prior to being issued a callsign and MDT profile.

## 7. In-Field & Hospital Medical Treatment System

The medical HUD is a drag-and-drop system: the treating medic drags the required healing item onto the injured body region shown on the patient model. Each injury lists its location, severity (e.g. Massive Trauma), and the item required to treat it.

### 7.1 Healing Items

| Item              | Use                                                                       |
|-------------------|---------------------------------------------------------------------------|
| Ice Pack          | Reduces swelling and numbs pain — used on bruising/swelling injuries      |
| Blood Bag (500ml) | Used for blood transfusions — must match the patient's blood type exactly |
| Bandage           | Stops bleeding and treats small injuries                                  |
| Antipyretics      | Medication that reduces fever                                             |

### 7.2 Blood Transfusions

Blood Bags are typed (e.g. O+, A-, B+, AB-). The HUD will display the exact type required — administering the wrong type is a treatment error and should be avoided. Stock all common types at the pillbox and confirm supply before shift start.

### 7.3 Injury Severity Levels

- Minor — light bandaging, quick treatment
- Moderate — requires multiple items, monitor vitals
- Massive Trauma — critical, treat immediately, prioritize under Code-Yellow/Code-Blue rules

### 7.4 Quick Actions

Use Check Pulse and Check Temperature before beginning treatment and log results on the incident report if abnormal.

## 8. Billing, Insurance & Pricing

| Service                             | Price   | Coverage / Notes                                                             |
|-------------------------------------|---------|------------------------------------------------------------------------------|
| Direct NPC Treatment (No Insurance) | \$500   | One-time treatment, charged per incident, walk-in/NPC billing                |
| Insurance Plan — 7 Day              | \$1,000 | Unlimited covered treatment for 7 in-game days                               |
| Insurance Plan — 30 Day             | \$4,000 | Unlimited covered treatment for 30 in-game days — best value for frequent RP |

*Pricing is set by Command Staff (Captain and above) and reviewed each season. Any change must be announced in the department Discord at least 48 hours before taking effect.*

## 8.1 Handling Payment

- Direct treatment is billed automatically through the NPC/medical terminal at time of service.
- Insurance is sold at the front desk or via MDT billing tab and logged against the citizen's profile.
- Medics do not accept side payments outside the system — all billing goes through official channels for audit purposes.

## 9. MDT — Medics Management Protocol

The Medics Management panel is the department's personnel system of record. Only Captain rank and above may open Edit Medic.

### 9.1 Editing a Medic Profile

- Name — must match the citizen's legal in-game name
- Department — set to EMS
- Rank — select from the dropdown (Student through Chief)

Save Changes immediately after any edit. Cancel discards unsaved changes without affecting the live roster.

### 9.2 Duty Records

Every clock-in/clock-out is timestamped automatically in Duty Records. Command staff should audit weekly duty hours against the department's minimum activity requirement.

### 9.3 Roster & Dispatch

Use Roster to view all active medics and Dispatch to monitor live calls. On-duty status and current assignment are visible from the medic's profile card at any time.

## 10. Recruitment & Interview SOP

## 10.1 Application Requirements

- Minimum 3 days on the server / clean RP record (no active bans or major strikes)
- Discord joined and application form submitted through the department channel
- Basic understanding of FiveM RP rules and EMS priority system

## 10.2 Interview Stages

- Stage 1 — Application Review (Sub Department Supervisor+ screens written application)
- Stage 2 — Voice/Text Interview (Captain+ conducts, 10–15 minutes)
- Stage 3 — In-Character Scenario Test (basic patient assessment and radio call walkthrough)
- Stage 4 — Final Approval (Deputy Chief or Chief signs off before roster entry)

## 10.3 Sample Interview Questions

- Walk us through how you would treat a patient with Massive Trauma to the head.
- What is the difference between Code-Yellow and Code-Blue, and how does that change your response?
- A patient needs a Blood Bag but you don't have their type in stock — what do you do?
- How do you stay in character while also being clear and professional on official radio traffic?
- Describe a time you had to de-escalate a stressful roleplay scene.

## 10.4 Onboarding Checklist

- Recite the Apex City EMS Oath
- MDT profile created — Name, Department: EMS, Rank: Student
- Callsign assigned (ST-## for Students)
- Shadow shift completed with a Paramedic or higher before solo duty

# 11. General Conduct & Roleplay Standards

## 11.1 Response Priority Order

When multiple calls are active, respond in this order: Code-Red → Code-Purple → Code-Blue → Code-Silver → Code-Yellow → Code-Green → Code-Black.

## 11.2 Radio Discipline

- Use 10-codes and phonetic callsigns on official channels at all times
- Keep transmissions short — use RTO if the channel needs to stay clear
- Confirm 10-4 on all direct orders from Sub Department Supervisor rank and above

### 11.3 Uniform & Appearance

- Full EMS uniform required while on duty, rank insignia visible
- Command staff (Captain+) may wear the command variant uniform

### 11.4 Chain of Command

Report issues in this order: Sub Department Supervisor → Sub Department Head (Captain) → High Command (Deputy Chief / Chief). Bypassing the chain of command for non-urgent matters should be avoided.

## 12. Branding Guidelines

This document and all department paperwork should carry the Apex City logo in the header for brand consistency and recognition.

### 12.1 Color Palette

- Primary — Apex Red (#8B0000)
- Secondary — Black (#1A1A1A)
- Accent — White (#FFFFFF)

### 12.2 Usage Rules

- Logo appears top-right of every page header
- Command documents are marked CONFIDENTIAL in the footer
- Do not stretch or recolor the logo outside official templates
